*“Recurring revenue is the  
best form of income!”*

*Just want to tip my hat to Chris Munch. His webinar  
converted around 35% (actually I think it was a bit more  
than that) of live attendees. Chris and his team were  
also total pros and made everything super stream  
lined and easy for my customers.  
Great promo and great way to do business.*

## ... And Who Is SkyRanker?

The Team behind SkyRanker is the same team of extraordinary, highly passionate, super-motivated individuals, who've put together record breaking products, launches, ideas... and continue to do so today.

We know the market, we know the funnels, we know how to kick ass and deliver massive **5-6 figure recurring revenues** to our affiliates... We've got your back!

=== The SkyRanker Dream Team ===

## What Audience Is It Best For?

With **SkyRanker** you have no real limit on the type of audience you can promote to and see wild success with. From SEO, to Ecommerce, to Amazon, to Local and Offline-Marketing and Beyond... **SkyRanker Makes 'em Happy!**

### For Traffic Enthusiasts?

I have been in the trenches of SEO since 1996. I came across SkyRanker and decided to try it for a recent promotion. I was floored when I submitted my release and had an instant #1 ranking for a very competitive launch keyword. There were dozens of sites competing and I beat them all in 15 minutes. In fact I held 3 of the top 4 spots. Moving forward I'm going to utilize Press Releases for my affiliate marketing as well as my local SEO business. This thing is the real deal, run, don't walk and sign up today.

## For SEO Pros?

Money Keyword - 2 hours to rank on first page - Press Release - Screw Penguin! Easy peasy, I use SkyRanker (Like PRWeb - only better!)

## For Ecommerce Stores?

Got on page 1 number 2 within an hour of the Press Release.  
Coincidence? Perhaps. This press release is for our ecommerce business. Today was our best sales day this month!

## For Profiteers?

I use SkyRanker and it's awesome. I made almost \$10k using is the smart way. Thanks for the opportunity!

## For Offline & Local Clients?

We used SkyRanker for a local client's press release and it far exceeded our expectations. Not only did the press release rank in the top 3 for several of our client's keywords, the clients site also jumped up in the search results, knocking a competitor off the first page in the process.

Our client is so happy that he's renewing with us for another \$5k contract. Very well done. For what they're charging, this service is a no brainer.

## For The Training?

So far I think the members training provided is worth the cost of the 10 pack. I am learning a lot.

## ... And For Real World Results?

**Christine F. Abela**

8:13pm

Giddy! I'm Christine F. Abela. I want to tell you about a press release I wrote for a client of mine that had some truly wonderful results.

L was trying to drum up publicity for a meeting she was holding in a very small country town in the outback of South Australia. The meeting was to alert locals of a problem in the hay they were feeding their animals - a problem that was

resulting in a lot of deaths, stillbirths and miscarriages.

But because the people there were not big internet users, and were scattered over a very wide area, she was having a lot of trouble reaching those she need to reach.

I wasn't so sure a press release would do the trick, but I was prepared to give it a go. I wrote a simple press release using the SkyRanker software in PressCable, and distributed it using PressCable.

Three days later I had a call from L, VERY excited. It turns out the local Member of Parliament has a Google Alert that lets him know when there is news for his area that he needs to know about. He was alerted to L's press release, and

he put the press release on his own web site. The local TV station was looking out for rural news, and picked it up too.

The TV station people came out to interview L about the problem, and the meeting, and she got huge publicity about it as a result. The local people, who might not use the Internet much, certainly watch the local TV news in the evening,

and here was L talking about something that concerned them greatly, and was in their own area. Having her on the TV added a lot of credibility, and it became a hot topic of local discussion.

The meeting was a success, and L was very pleased. After syndication (copying from one site to another), that one press release now has around 4,000 results on Google. There were no links to a web site from that press release, but

imagine if it had been promoting a web site - 4,000 backlinks!

So even if you are in the outback in Australia and trying to reach an audience that doesn't even use the internet, a press release with PressCable might just do the trick for you too.
